

(We recommend that you print this page for better readability.)

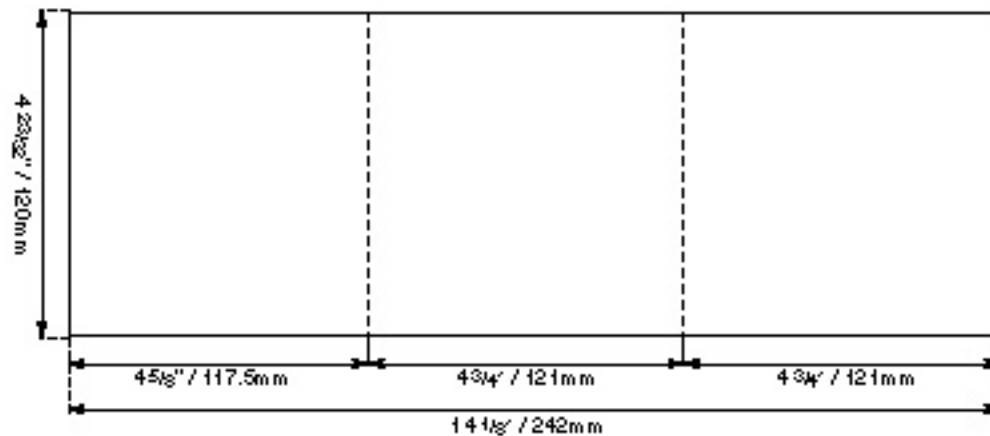

CD 4 Panel Booklet

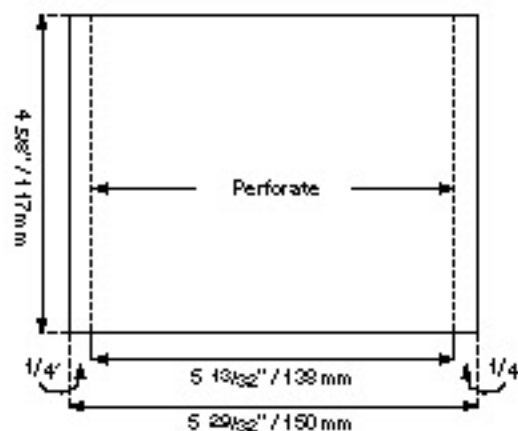

Specifications for basic compact disc printed materials
The booklet is seen through the front of the jewel case.
It usually contains disc information, getting started instructions, and other related information

Booklets should open to the left.
Booklets should be prefolded.
Recommended paper weight is 100# minimum.
Total thickness must be less than .071"/1.8mm.

CD 6 Panel Booklet

CD Tray Card

The tray card is seen through the back of the jewel case.
It usually contains graphics and some information about the disc.

Inlays must be perforated by your printer.
Recommended paper weight is 100# minimum.

We recommend that you order 10% overage on printed materials to avoid the cost of a second run. If the above specifications are not followed, we cannot guarantee the appearance of the material after insertion into the jewel case. If hand insertion is required, additional costs will be charged.
